## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over (DE '778) or Satake (US 5,295,629) in view of Fritsch (US 5,655,894). The DE '778 or Satake reference discloses the claimed invention except for membrane drive. The patent to Fritsch discloses that a membrane drive (abstract, line 6) is old and well-known. Thus, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have provided either of DE '778 or Satake with a membrane drive as suggested by Fritsch in order to have the baffle plate be continuously actuated, if desired.

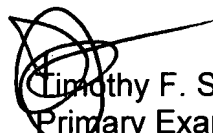

### ***Response to Arguments***

Applicant's arguments with respect to the claims have been considered but are moot in view of the new grounds of rejection.
